

The context of a word is the printed text of which that word is part. By studying a word's context, we may find clues to its meaning. We might find a clue in the immediate or adjoining sentence or phrase in which the word appears; in the topic or subject matter of the passage; or in the physical features—such as photographs, illustrations, charts, graphs, captions, and headings—of a page itself.

The Reading Passages as well as the Using Context, Choosing the Right Word, Vocabulary in Context, and Vocabulary for Comprehension exercises that appear in the Units, the Reviews, and the Final Mastery Test provide practice in using context to decode and to determine the meaning of unfamiliar words.

Three types of context clues appear in the exercises in this book.

For example:			_	
Faithfully reading	a weekly newsmag	gazine not only broa	adens my knowledge	of
current events and world or national affairs but also			my voca	ıbulary.
a. decreases	b. fragments	c. increases	d. contains	

In this sentence, *broadens* is a synonym of the missing word, *increases*, and acts as a restatement clue for it

A **restatement clue** consists of a synonym for or a definition of the missing word.

A **contrast clue** consists of an antonym for or a phase that means the opposite of the missing word. For example:

"My view of the situation may be far too rosy," I admitted. "On the other hand, yours may be a bit (optimistic, bleak)."

In this sentence, *rosy* is an antonym of the missing word, *bleak*. This is confirmed by the presence of the phrase *on the other hand*, which indicates that the answer must be the opposite of *rosy*.

An **inference clue** implies but does not directly state the meaning of the missing word or words. For example:

"A treat for all ages," the review read, "this wonderful novel combines the of a scholar with the skill and artistry of an expert			
a. ignorance painter	c. wealth surgeon		
b. wisdom beginner	d. knowledge storyteller		

In this sentence, there are several inference clues: (a) the word scholar suggests knowledge; (b) the words novel, artistry, and skill suggests the word storyteller. These words are inference clues because they suggest or imply, but do not directly state, the missing word or words.
